# Weather Shield Enclosure

**M9000-300**

Shown Mounted on a Control Damper

## Description

The M9000-300 Weather Shield Enclosure is a cost effective and rugged weather shield designed to protect M9000 actuators in outdoor damper applications. The weather shield enclosure is designed to NEMA 4 specifications, and does not allow any moisture to penetrate the custom designed seals.

The weather shield cover is constructed of a sturdy ABS material injected with ultraviolet inhibitors, which prevents the cover from

becoming brittle or damaged by the sun or any other outdoor element. In addition, this translucent material allows the actuator to be fully viewable. It includes a gasket, damper bracket, anti-rotation bracket, anti-rotation pin, and a liquid tight conduit connector. The base is constructed of a durable nylon blend that provides flexibility and durability.

For more information on the actuators, refer to the appropriate literature: *M9108, M9116, M9124, and M9132 Series Electric Non-spring Return Actuators Installation Instructions, Part No. 34-636-399*; *M9109 Series Electric Non-spring Return Actuators Installation Instructions, Part No. 34-636-1190*; *M9216 Series Electric Spring Return Actuators Installation Instructions, Part No. 34-636-461*; *M9106-xGx-2 Series Electric Non-spring Return Actuators Installation Instructions, Part No. 34-636-1085*; or the *M9206 Series Electric Spring Return Actuators Installation Instructions, Part No. 34-1280-9*.
